

## Determining Eligibility for NIGMS Training and Research Education Programs to Enhance Diversity

*For diversity enhancing programs, NIGMS recognizes separate institutional eligibility tracks: research-intensive, i.e., those with an average of NIH research project grant (RPG) funding greater than or equal to \$7.5 million total costs per year over the past 3 fiscal years, and research-active, i.e., those with an average of RPG funding less than \$7.5 million total costs per year over the past 3 fiscal years (RPG data are available through NIH RePORTER). For example, FY 2018, FY 2019 and FY 2020 for applications submitted in May 2021.*

1. To determine Research Project Grant (RPG) funding, visit NIH RePORTER (<https://report.nih.gov/>). Select the “Funding” feature.

The screenshot shows the NIH RePORTER website interface. The top navigation bar includes links for Research, Organizations, Workforce, Funding (highlighted with a red box), Reports, and Links and Data. Below the navigation bar is the NIH RePORTER logo and the text "Research Portfolio Online Reporting Tools". A central search bar is labeled "RePORTER Quick Search" and contains a search input field and a "Search" button. Below the search bar is a prompt: "Enter just about anything to search: text, PI names, project numbers, fiscal year, agency, etc.". At the bottom of the page, there are five icons representing different features: RePORTER, Matchmaker, Awards by Location, Categorical Spending, and NIH Data Book.

### Welcome to Research Portfolio Online Reporting Tools

(RePORT)

In addition to carrying out its scientific mission, the NIH exemplifies and promotes the highest level of public accountability. To that end, the Research Portfolio Online Reporting Tools provides access to reports, data, and analyses of NIH research activities, including information on NIH expenditures and the results of NIH supported research.

#### Spotlight

[NIH COVID-19 Research](#)

Explore NIH's comprehensive summary of ongoing COVID-19 research, including funding, clinical trials, and more.

[Preview a modernized RePORTER](#), which offers faster searches and mobile-friendly interface.

[Subscribe](#) to the NIH RePORT ListServ to stay up to date on changes to these sites.

2. On the Funding page, select **Awards by Location**.

## Funding

The NIH funding data consists of an expansive reporting and information knowledge base. Located here are data on everything from success rates to historical NIH spending categories, from extramural grant and contract award statistics to NIH budget appropriations and levels of spending by budget mechanisms. A grantee is legally accountable for the performance and financial aspects of the grant-supported project or activity. The NIH is then responsible to the public for complete and accurate reporting of all results.

### NIH Data Book

The NIH Data Book (NDB) provides basic summary statistics on extramural grants and contract awards, grant applications, the organizations that NIH supports, the trainees and fellows supported through NIH programs, and the national biomedical workforce.

### Awards by Location

Consolidates all information about NIH-supported extramural organizations in a single tool.

### Success Rates

Computed on a FY basis, success rates are defined by the percentage of applications funded and the total number of applications reviewed in various budget and grant activity categories.

3. Enter all or part of the institution's name in the **Organization** cell, then click **SELECT**. Select the institution from the list provided. Submit Query.
